Memo to File:

RE: Rush Valley Enterprises, Inc.
Tub Hill Mine
ACT/045/015
Tooele County, Utah

On July 29, 1983, Susan Linner and Tom Portle of the Division visited the Tub Hill facilities site. The site appears to have been abandoned before processing facilities were completed. Present are a cement pad, a couple of tar paper and plywood buildings, a truck trailer, and various lengths of PVC piping. Sacks containing materials which appeared to be ore were sitting on the pad. The former operators should be contacted to determine their future plans for the area and whether or not reclamation work should be commenced at this time.

Memo to File:

RE: Rush Valley Enterprises, Inc.
Tub Hill Mine
ACT/045/015
Tooele County, Utah

On July 29, 1983, Susan Linner and Tom Portle of the Division visited the DOE to ascertain its status. No activity of any kind appears to have occurred since July 9, 1981.

An inclined cement pad (from 2 directions) would cause leachate to reach a low point from which it would proceed to the resident "black box". The process building, the pad, abandoned semi trailer and a graded disturbance (old pit?) were all in the same state as shown in photos taken July 9, 1981.
